DETAILED ACTION

1. This is responsive to Applicant's amendment of 22 November 2005.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-4, 6-20, and 22-32, drawn to an information system for playback of stored content, classified in class 709, subclass 231.
 - II. Claims 33-48, drawn to a menu system for the selection and playback of content, classified in class 709, subclass 218.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the storage and playback of the content is not dependent upon a menu system in claims 1-32. The subcombination has separate utility such as a menu for selection of files to be transported over the Internet.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
